

MDA Mail Services Quick Tips

Important Updates for US and International Shippers

- ▶ A sender name or sender company name is required. For shipments to the US or international destinations, your shipping labels must include the full name of the sender or the sender's company name. You will not be able to create a US or international shipping label without this information.
- ▶ "Gift" as a reason for export is no longer available. Please select another reason.
- ▶ Standardized country codes are required. When entering country code in the customs section of your shipment, use the standardized country codes known as ITMATT accepted codes. Look up country codes.
- ▶ MDA requires to know the content of the parcel/package being sent. Attach a paper to the item indicating the contents. We will not be able to create a shipping label without it.
- ▶ A phone number is mandatory on all US and International parcels.
